How many bones does the adult human have? ________________________________

Name the 6 bone shapes and provide a BRIEF description of each. In your description, name a couple of specific examples. See the example in Sutural bones for guidance.

1. 

2. 

3. Sutural bones. Flat bones between the bones of the skull in the suture.

4. 

5. 

6. 

On the skeleton below, draw an arrow and label an example of where the different bone shapes will be located. Name the shape, name the bone(s).
Label the pictures below using the following bone marking terms.

Trochanter    Head    Neck    Tubercle    Tuberosity    Epicondyle    Trochlea
Sinus        Process    Foramen    Fissure    Crest    Spine    Ramus
